

SATELLITE
HEALTHCARE

> for people.
for progress.

A Common Mission. Uncommon Results.

Satellite Healthcare is more than simply a dialysis company. Since our founding in 1974, we have become the industry's leader in personalized quality care, far ahead of all other providers. Our success in caring for patients can be attributed to our mission, our not-for-profit structure, and our people. Together, they create a powerfully patient-centered organization.

Dietitian Opportunities

At Satellite Healthcare, our mission is clear: to make life better for those living with kidney disease. Because we are a non-profit, we can pursue that mission with all our resources, united by our passion for patient care. As part of our commitment to continuous improvement, Satellite Research explores new ways to elevate the effectiveness and delivery of dialysis therapy. And Satellite WellBound is leading the industry in home dialysis because better outcomes and quality of life are our highest priority.

Satellite Healthcare's Total Rewards Program is a clear and tangible expression of our commitment to help our employees reach their greatest potential. It's a comprehensive plan that gives you the peace of mind to thrive in every area of your life. A choice of quality health plans is an important component, but Total Rewards encompasses so much more. There are programs for personal wellness, financial well-being, professional development, paid time off, rewards, recognition, scholarships, commuting expenses, and more. We even help with insurance for your pets.

If you'd like to put your passion to work and are interested in helping people live the best life they can on dialysis, join us today.
